

ALL-GLASS DOORS

In the all-glass doors there is a 8 mm thick hard glass with the application of a sandblast pattern on one side of the glass or complete sandblasting of the glass.

By default, sandblast is applied from the loop side of the canvas!

Continuous sandblast of the opposite side of the canvas is calculated individually!

Drawing a pattern according to the layout of the customer is calculated individually!

The application of several layers of satin, to achieve visibility of the three-dimensional pattern, is calculated individually.

Finishing laths, platbands and expander - standard, painting on MDF or veneer.

The door unit is completed with Casma Quadra-Claustra loops and the mechanism with the Schlechtendahl handle.

For an additional fee it is possible to equip the door unit with a turnkey or WC mechanism.

It is also possible to complete the fabric with "MERONI" fittings.

It is possible to install a sliding system.
